

FE PBM 210 PIPE BEVELING MACHINES

PORTABLE ELECTRIC AND PNEUMATIC PIPE BEVELING MACHINES

The unique FE Powertools pipe beveling machine line is build up from machines for small diameter pipes from 22 MM upto diameter 630 MM, for every application the right machine. These machines are used for membrane walls or steam generators and or portable pipe-beveling machines for weld preparations.

It is now easy to make a bevelled edge on pipes and/or tubes. Fe Powertools offers you a large selection of electric and pneumatic machines. Fe PBM machines are easy to clamp with a standard set of mandrels. With this unique system the machine centers itself.

A bevel on pipes can be made easily and safely. You can choose from 7 different machines, the choice depends on the internal and external diameter of the pipe.

Driven:	Electric
Power supply:	220-240 V 50/60Hz
Motor power:	1200 watt
Clamping range:	(ID) 65 – 210
Working range:	(OD) 8"- (219.08mm)
Wall thickness max.:	<20MM
Rotation speed:	24 MIN - 1
Working weight:	28 KG
Shipping weight:	44 KG
Packing size 6:	50x280x250MM

All Fe PMB machines come standard with electric motor.

On request we can supply with pneumatic motor.

CUTTERS FOR FE PBM INSIDE PIPE BEVELER

CUTTER	ART NO.	DESCRIPTION	
Plain cutter	FECI 7.0001	Plain 0°	
Bevel cutter	FECI 7.0003	Bevel 30°	

CUTTER	ART NO.	DESCRIPTION	
Bevel cutter	FECI 7.0004	bevel 37,5°	
Interior bevel cutter	FECI 7.0002	bevel 15°
